PLEASE NOTE: If a note is not fretting tight to the neck and not ringing clear you may need to move the capo slightly towards the problem string this should distribute the force in that direction and hold the string down tight so it can ring clear. If your string action is too high that it frets out on the bottom of the capo clip you can apply a O-ring spacer to the fretter to make it higher and fix: CONTACT sales@capoclips.com, Facebook & Youtube Ph: 212-677-2235 US Patent 20130118334 A1

For the D minor it may be necessary to place the included 2- O-ring spacers on the fretter as shown above.

Also many other variations!
